🧠 Skills

Analytics Tools

Python, Pandas, NumPy, MS Excel, MySQL.

Front-End Tools

Next.js, TypeScript, Javascript, React.js, React Native, Tailwind CSS, Tanstack Query, Zustand, Zod.

Backend-End Tools

Node.js, Next.js, firebase.

Other Tools & Skills

Linux, VS Code, Git, Github.

📄 Certificates

- Data Science And Machine Learning Internship Program [↗](#)
- The Complete Python Masterclass: Learn Python From Scratch [↗](#)
- Hero Electric Bike Challenge (ISIE India) [↗](#)

🎓 Education

B.Tech (IT-AIR)

Madhav Institute of Technology and Science - 2020-24
present

- CGPA: 8.01

HSE (Maths Science)

Chhatrapati Shivaji Public School
• Scored 74%.

SSC

Ashoka Hall Junior & High School
• Scored 8.4 CGPA.

👤 Profile

Innovative Software Developer with a proven track record in modernizing and optimizing web applications. Recently led a comprehensive rebuild of customer and admin panels using Next.js and TypeScript, dramatically improving site performance from below 60% to above 90%. Expertise in creating scalable, high-performance front-end solutions that enhance user experience and SEO. Skilled in translating complex requirements into user-friendly interfaces, with a strong foundation in React.js, Next.js and also React Native. Demonstrated rapid career progression from intern to impactful full-time developer, showcasing adaptability and excellence in fast-paced environments.

📁 Professional Experience

Software Developer I

Deliverex [↗](#)

Nov 2022 – present

Career Progression Journey:

- Started as a **Front-End Developer Intern** in Nov 2022
- **Demonstrated exceptional skills and initiative** during internship
- **Contributed groundwork to the redesign project**, which became a pivotal factor in transitioning to a full-time role
- **Promoted to Software Developer I in May 2024** based on performance and project contributions.

Key Achievements:

- **Spearheaded** a comprehensive redesign of customer panel, landing page, and admin panel using **Next.js** and **TypeScript**
- **Dramatically improved** site performance, increasing scores from below 60% to above **90%**
- Achieved a **90% increase in user engagement** through enhanced user experience and **SEO optimization**
- Implemented **modern front-end technologies**, focusing on best practices in **code organization, testing, and deployment**

📁 Projects

Anime Streaming Website [↗](#)

Ongoing Side-Project

Developing a comprehensive anime streaming platform using **Next.js**, **Tailwind CSS**, and **Node.js**. Implemented server-side rendering and PWA.

House Price Prediction [↗](#)

Python, Data Analysis, Flask

Build a house price prediction website by implementing **linear regression model** for accurate house price predictions. Utilized **Flask** to connect the machine learning backend with a user-friendly frontend interface.

Web Development

Email-Sms Automation Website

- Developed a **EMAIL** and **SMS** sending panel for a French client.
- It sends emails and SMS messages to users using **Nodemailer** and **Twilio**.

App development [↗](#)

Moovel Automotive Parts

Developed a mobile application using **React Native** with **Firebase** backend for a client, demonstrating cross-platform development skills and real-time database integration.

Web Development [↗](#)

Assyou (Multi-Vendor E-commerce Platform)

Developed a comprehensive e-commerce solution using **Next.js**, **TypeScript**, and **Firebase**. Features include customer, vendor, and admin panels, integrated **Razorpay** payment gateway.
